MLS Organization Chart

Security Protection of Highway Infrastructure

- 46,717 miles of Interstate highway
- 114,700 miles of other National Highway System roads
- 3,801,849 miles of local roads
- 582,000 bridges over 20 feet of span
- 350 tunnels over 100 meters in length
- 89 million commercial trucks
- 136 million automobiles.

Highway Infrastructure Landscape

- Ownership
 - Bridges/Tunnels owned by states, cities, private entities; Facilities owned privately; Driver licensing done by the states.
- Major Partners
 - American Association of State Highway Transportation Officials (AASHTO)
 - American Bus Association (ABA)
 - American Trucking Association (ATA)
 - Federal Highway Administration (FHWA)
 - Federal Motor Carrier Safety Administration (FMCSA)
 - Owner Operator Independent Drivers Association (OOIDA)
 - National Highway Traffic Safety Administration (NHTSA)
 - United Motorcoach Association (UMA)
 - Various Hazardous Materials Associations.

Corporate Security Reviews (CSRs)

- CSRs – site visits to owners and operators of bridges, tunnels, highway assets
 - Program began in May 2004
 - Conduct analysis and review of security plans, critical asset lists, and mitigation strategies.
- CSRs encourage constructive working relationships between TSA and stakeholders by promoting:
 - Outreach activities
 - Continuous communication
 - Positive incentives for security-related improvements.

Corporate Security Reviews (CSRs)

- CSR outcomes will include:
 - Assessing national security baselines for various modes
 - Providing security gap analysis
 - Comparative analysis
 - Trend analysis
 - Sharing of best practices
 - Determining implementation validity.
- We have completed 11 CSRs across the Nation in FY04
 - 24 scheduled for FY05
 - Remainder of states and territories scheduled for FY06.
